PROJECTS

Job Portal

April-May 2021

IIIT Allahabad

- A Java Swing GUI based project built using Netbeans IDE on the concepts of Database Management System using MySQL.
- It enables job-seekers to post their resume, search for jobs, view personal job listings. It enables companies to register and search for candidate resumes.
- Apart from there is an admin module to make changes to the database content.

HVAC Monitoring System

February-May 2021

IIIT Allahabad

- An Android app-based project built using Android Studio
- Enables user to add or remove devices and also enables to enter the data of room like temperature, humidity, AQL.
- Based on the entered data, the system automatically displays required smart data to adjust the states of available devices like AC's, fans, heaters, ventilators to provide thermal comfort and improve the indoor air quality.
- Technologies used:** Java, MongoDB

Access Restriction System

November 2020

IIIT Allahabad

- A Java Swing project built using Netbeans IDE on the concepts of Object-Oriented Methodologies.
- It enables users to register themselves with their respective data. When a user tries to enter, it shows if the user has access to enter or not using respective time slots stored during registration. Users may also update their data.
- Technologies used:** Java, MySQL
